

## + summary

A web developer with a non-profit management background, passionate about visual arts and digital media. I rediscovered my interest in coding after maintaining the City of Chicago's Children Services Division website and I have been pursuing coding knowledge ever since. Coding appeals to me because it marries my interests in problem solving and bringing abstract ideas to life.

## + projects

### DramaStash

DramaStash is a tool for discovering, tracking, and sharing Asian television dramas. Users are able to: add dramas to custom stashes, rate and review dramas, and follow other users. (AngularJS/Ruby on Rails/Sass/Foundation CSS/Karma/RSpec)

### FAQrator

FAQrator is a tool for creating dynamic ad-hoc FAQs for events like lectures, classes, projects, etc. Users can create topics, which will allow users to submit questions to be answered. The topic creator is able to view the list of open questions and submit answers based on a secret edit page, which can be accessed by a generated key, so that they may be able to share list control with others. (Ruby on Rails/Javascript/Materialize CSS)
